

DSA Strategies for practicing without knowing the topic

karsh tandon

NOTE:DO this after you have covered core DSA patterns and have done some practice topicwise.

1. Live/Virtual Contests (Best way)

Platform: Leetcode

2. Pick Random questions from Leetcode (Without the topic according to your difficulty level + 1, no point of practicing questions that you find easy)
3. Mock Interviews - Pramp
4. Pick recent interview problems from [Leetcode discuss](#) and solve on your own [V. Imp to get flavour of recent trend]
5. **If you have more time:**
 - a. **contests on:** codechef, hackerank, codeforces
 - b. [Medium.Com](#) interview blogs
